

## Season 1 Episode 5

## Heavenly Pleasure

Ivan, Dirk, and Safron are stationed in a star craft that is travelling fast through space. Safron twirls around in a chair and she said, "Ivan, you seemed very passionate about taking this test mission on this experimental space craft." Ivan said, "The fastest craft in the universe I'm from can travel no where near the speed of light. This space craft has so much technology from other universes in it that it could probably break the laws of physics allowing us to travel anywhere in the Ultraverse we desire." Safron said, "I see how that could be beneficial." Ivan said, "It could also help me find my father. My father has been missing for weeks now and there are still no signs of him anywhere." Safron said, "I'm sure he will turn up." Dirk is sitting at a computer controller and he is joining hyphens with squares on the screen. Ivan said, "That must be the new control interface they just made for this ship. It looks futuristic yet old school at the same time." Dirk said, "Actually, this is just some game I found on this computer. I needed something to do while you two lovebirds discuss your feelings for each other." Ivan said, "Then where are the controls?" Dirk said, "I think they are on that control panel there or something." Ivan and Safron go to the lead controls. Ivan said, "It looks like we are going at twelve Hectaries per second. It looks like that is not our fastest speed. If we crank this up some more..." Ivan turns it up some more and the ship increases in speed.

Dirk sees the ship is going faster and he said, "Now this is what I'm talking about." Safron said, "It is not a good idea to go fast like this. What if the ship malfunctions and we end up destroyed between universes or..." Ivan looks at the GPS in the ship and Ivan said, "It looks like there is an energy signature that indicates my father is close by. I have to pursue this." Safron said, "Don't do it, Ivan." Ivan holds onto the lead control stick and sweat pours down his head. Ivan let goes and he said, "You're right. I am being too cocky. I haven't seen my father in weeks and I thought..." Safron pats Ivan on the back and she said, "I know. You are just tempted." Dirk said, "Screw this soap opera crap. I am taking this into my own hands." Dirk gets to the controls and he turns it to the fastest speed possible. Ivan, Safron, and Dirk get smashed on the side of a wall and the ship is going at a speed that is unimaginable. There is a vortex outside and it is spinning.

The star craft zips through several planets and universes and it forms a rip in the universe and it flies into the rip in the universe. The rip in the universe seals up after the star craft enters the rip. They fly through waves of energy and vortexes and they crash land on a platform in clouds. Ivan said, "Where are we?" Safron looks outside and she said, "It looks like we're in ancient Greece." Ivan said, "Did we go back in time?" Dirk said, "Ancient Greece sucks." Safron said, "We probably went into a different universe that looks like ancient Greece." Ivan said, "Why are we on clouds?"

Ivan, Dirk, and Safron, leave the ship and they walk around the platform and they see there are more of them with cylindrical buildings with swirls on top and they see a large platform with commercial buildings on them. Safron said, "This can't be ancient Greece. We are on clouds and there are commercial buildings over there." Ivan said, "We should find out where we are."

They walk to the platform of commercial buildings and they see everyone there wears togas and they have leaves around their heads. They see a villager with a bell and he has stacks of newspapers. Ivan and his friends go to the man and Ivan said, "Sir, may you tell us where we are and what is this place?" The villager said, "You are in Heaven. This is the universe of all Heavenly things." Ivan said, "I thought that is where people go when they die." Dirk said, "I though that was somewhere in the ground." The villager said, "This is the afterlife. This is where anyone goes when they die." Ivan said, "We are dead?" Ivan faints and falls on the ground. Safron gets Ivan back up and Safron said, "We got here on some ship that can travel through universes. The ship crashed and it needs repairs. Do you know anyone that can fix the ship?" The villager said, "We will bring it to our all glorious leader. He rules all of us. There is nothing he can't fix and there is nothing he can't do."

Keith is in the Monk temple in the Ultraverse. Keith is looking through the library and he finds some books. Keith opens up one of them and he looks through some of the pages. Keith finds a page on compressing objects into universes. Keith said, "This book contains instructions to build a machine that compacts matter. It even says you can create new universes based on objects and people." Keith takes out a notepad and he takes note of this. Augi enters the library and he finds Keith. Augi said, "Keith, I need your help."

Keith is in Augi's office and Augi said, "Keith, I am glad I can find you because I think you are the monk that is the best for this job." Keith said, "I seem to be the best at all the other jobs you have given me." Augi said, "A few days ago, I sent Ivan, Safron, and Dirk on an experimental interuniversal star ship or star craft that can travel so fast it can bend the very fabric of the universe. Our engineers have monitored the activity log

from the ship and it seems that the ship traveled faster than it is intended and it created a rip in the Ultraverse and it is now in some sort of existence that was previously undiscovered. Ivan, Dirk, and Safron are stuck there and we need someone to lead a team to get them out of there. I want you to lead that team.” Keith gets up and he salutes Augi. Keith said, “Consider it, done.”

Ivan, Safron, and Dirk drag the ship to the giant building sitting on its own cloud. They go to the front foyer and they look around at the seemingly empty hollow building. Dirk said, “This building is empty. There is nothing here.” Safron said, “Perhaps he is invisible or something.” A booming voice said, “You have come my friends.” A wall is wheeled up and behind it is a giant throne room with a giant seat and in the giant seat is a giant, Convind. Ivan, Safron, and Dirk’s eyes go big and they draw out their swords. Convind said, “You see, I rule the afterlife. Everyone here is my slave. Since you are here, that makes you my slaves.” Ivan said, “Is this where you have been since I slashed you?” Convind said, “I have been building this place for years. Let me show you.”

Convind shows Ivan, Dirk, and Safron around Heaven. He said, “There are average working people that work in stores like people in your universe.” He shows them stores that resemble stores seen in the universe Ivan and Dirk are from. Convind said, “You make a decent wage and most of it goes to me and you still get to do fun things.” Ivan said, “There is no way working for you could be fun.” Convind shows them to a skatepark where there is a half-pipe and people skateboard on it. Safron’s eyes go big and she pulls out her skateboard and goes skating and she does tricks. Convind said, “You see, this is a fun place. You guys should really consider ditching your pitiful lives and come and live here with me.” Ivan said, “I know something is up.”

Convind said, “Gaming is a big and major industry in this realm so we have a mall-sized arcade of all your favorite games.” Dirk sees all the games and his head figuratively explodes. Dirk jumps and he hops through the arcade and he plays some of the games and he punches the coin slots on them and coins pour out. Convind said, “That’s how some people make an honest living in your world so why not have it in mine?” Ivan said, “You cannot manipulate me like this. I will...” Convind shows Ivan a giant yin-yang that is a fully functional mansion house. Convind said, “This yin-yang is going to be your new home.” Convind shows Ivan the inside where there is a luxurious TV, and living room. Ivan said, “I am still not falling for this.” Convind shows Ivan the back where there is a giant swimming pool and there are naked statues around the pool. There are also gorgeous girls dressed as ancient Greeks. One of the girls said, “C’mon Ivan, don’t you want to come in. The water is awfully warm.” Ivan gives Convind a stern look and Ivan said, “Your manipulations will never impact me.” Convind said, “I guess you don’t want the real prize behind this.” Convind snaps his fingers and

Ivan's father is in the pool with the girls. Ivan's father said, "Hey, Ivan! Come in." Ivan said, "Father?" Ivan dresses into a yin-yang swimsuit and he jumps in the pool next to his father.

Ivan said, "Is this where you were brought to?" Ivan's father said, "You know son, I knew there were insidious things going on back where we were from so I needed to ditch where we were from and move to a nicer reality. It ended up being this one. You have to trust me. Convind is an excellent leader. He is way better than that president we had back in our country. Bush will never be my president." Ivan said, "What was I showing you when we last met?" Ivan's father said, "That's an easy question. You were showing me that USB stick you had that had hundreds of emulated games on it." Ivan said, "I also came to you about a problem. Do you remember what it was?" Ivan's father said, "Your principal was not being a pal and instead he was being an uber jerk." Ivan thinks to himself and Ivan said, "He checks out."

Keith is in a dark red lit room and he looks at screens. Keith said, "I have the trajectory coordinates here but it does not look like it leads anywhere. It seems it just strays away into nothing." Roswell is with Keith and Roswell said, "Maybe there was an entity here but it disappeared and is no longer here." Keith said, "That would have to be the case." Keith takes a close careful look at the computer screen showing specs. Keith sees a spec of dirt on the screen and he tries to flick it off. The spec does not flick off. Keith said, "Wait a minute. There's something on this radar. It appears to be very small and compact. So small in fact that we cannot receive accurate reads from the spec." Roswell said, "Now how are we going to analyze something that's out in the middle of space without our scanner or..." Roswell spots the book that Keith got from the library earlier. Roswell said, "I think I have an answer." Keith picks up the book and he looks through it and he finds the page on universe compression. Keith said, "It seems this universe compression theory could work in reverse. Good thing I have a background in science and technology."

Keith and Roswell set up machines and equipment while the hands on the clock spin around fast. Keith and Roswell set up an entire laboratory in the room in the star ship they are in. Keith said, "Here goes nothing." Roswell looks away and Keith flicks the switch and it sends a giant beam to the small spec and the spec opens up into a rip in the universe. Keith said, "It works." Roswell said, "On the plus side. We can go and get our friends." Keith said, "It is time to assemble our army. Something tells me we are going to be needing our army."

Keith, Roswell, and legions of Monks land on a platform and they explore the strange realm that looks like ancient Greece. They walk past a sculpture of Convind.

Roswell said, "Welp, that can't be good." Keith said, "Convind must be here." All the Monks draw out their swords. They walk through the main commercial center where everything looks peaceful. Keith said, "Something is up." They walk past a skatepark and they see Safron dominating the park. Keith walks to the half-pipe and Keith said, "Safron! What's going on here?" Safron said, "This place is the greatest universe I have been to. You can play all day and make an honest living. Convind really is a great president that no one elected." Keith said, "Where's Ivan?" Safron said, "He is probably in his mansion that Convind just gave him. Convind lets all his people live in mansions. That guy really is the greatest." Keith said, "You must snap out of this. Convind is manipulating you." Safron said, "I doubt it. It is never wrong when it involves skating in the park." Keith looks at the other Monks and he said, "Looks like we lost Safron."

The Monks walk past the arcade and they see Dirk playing and acing all the games. Keith said, "Dirk! Don't tell me Convind got to you too." Dirk said, "Suck it up nerd. This is the most fun that could exist and if you are going to take that from me then prepare to get beat up." Dirk stops playing and he gets ready to beat up Keith. Dirk throws a punch and Keith blocks it with his Cyan Sword of Redemption. Keith blocks more punches and Dirk reaches over Keith and he pulls Keith's underwear over Keith's head. Keith spins and walks around. Dirk said, "Who else wants a beating from me?" Roswell hovers over Dirk and Roswell said, "Raw, can't touch me." Dirk said, "I most certainly can." Dirk jumps and Roswell hovers more. All the other Monks stand back and they shake in fear. Roswell grabs onto Dirk's pants and he flies Dirk to the roof and he places Dirk there. Roswell said, "Stay here to learn your lesson, Dirk will." Dirk said, "You can't defeat me, bird." Dirks throws his arms around and the point of the building he is on breaks and he falls and smashes his head into the ground. Dirk gets back up and he said, "What happened?" Roswell said, "Convind took over your mind making you a mindless slave. He also took your lunch money." Dirk makes fists and he said, "No one takes over me and no one never touches my lunch money."

Dirk goes to the skatepark and he grabs onto Safron and he carries her over to Ivan's mansion. The Monks smash through Ivan's mansion and warriors that look like Convind come out. The Monks fight the warriors. In the midst of the action, Keith sneaks past all the warriors and he goes to the back where the pool is and Ivan is getting fed grapes by beautiful women while he chats with his father. Keith runs for Ivan and he said, "Ivan, it looks like they got you too." Ivan said, "Keith, this is my father. He was here the whole time. I started my quest with you Monks so I can find my father. I just did that." Keith said, "That is not your father. That is just a thingment of your imagination." Ivan's father gets up and he said, "Let me deal with this." Ivan's father pulls out a large luxurious sword and he slashes Keith's sword with it.

Keith and Ivan's father duel. Ivan's father gets a strong grip on Keith's blade with his blade. Keith is thrown into the pool. Ivan's father jumps into the pool and he continues dueling Keith. Keith is pushed well into the deep end and Keith begins to fall into the water. Keith splashes around. Keith said, "I can't swim!" Keith said, "That is the one lesson I flunked out of in Monk Academy." Keith violently flails his arms around. Ivan watches this and he sees that Keith is in mortal peril. Ivan leaves the girls he is with and he swims and rescues Keith and brings him to the edge of the water. Keith falls flat and he coughs up water. Ivan's father said, "Now that we got that taken care of." Ivan jabs his sword into his father and his father fades away into a swirly mist and disappears. Ivan said, "What just happened?" Keith said, "It was all an illusion. All of this is fake. Nothing is real. Convind got the better of you. We need to get out of here. We got your friends too." Safron sees Ivan and she said, "Ivan!" She runs for Ivan and hugs him.

The Monks get in the ship and they take off and leave the realm. Then a giant Convind comes and he leaves the rip and he runs after the ship. He tries to grab the ship and the ship zips left to right dodging Convind. Keith puts the ship into the fastest speed and they arrive at the Ultraverse mainland and they get out and Convind is there. Convind is a giant and he smashes and destroys the buildings. Convind said, "You guys are doomed. I have more than you realize." Keith leads a large crowd of Monks and he said, "Monks, pile on him!" The Monks run and they pile on Convind. They try to pin him down and they barely hold him down. Ivan, Safron, Dirk, Keith, and Roswell are on the sideline and they set up the machine that compacts matter. They fire a beam of this at Convind and he is reduced into a blue universe marble. Keith takes the marble and he places it on the ground. Keith takes a hammer and he smashes the marble into oblivion. Keith said, "We will never see him again." Dirk jumps on the shards and he kicks them around. Dirk said, "That's for taking my mind which no one takes." Ivan kicks more of the shards and he said, "That's for tricking me into thinking I found my father. Wait, if that wasn't my father, then my father is still out there somewhere." Ivan looks up into the sky.
